Economic Impact Review Statement Water Quality Program

Property Address

Effective July 2, 2007, Amended Substitute House Bill 119 (AM. Sub. HB 119), also known as the state budget bill, made changes to Ohio's sewage treatment laws, rules and requirements. Provisions of the bill authorize a local board of health to adopt standards for use in its health district that are more stringent than the rules adopted under division (A) (1) or (2) of Amended Substitute House Bill 119, **provided that the board of health, in adopting such standards, considers the economic impact of those standards on property owners, the state of available technology, and the nature and economics of the available alternatives.** In addition to ensuring that a sewage treatment system (STS) will not create a public health nuisance, an economic impact review is also required when Franklin County Public Health considers the approval or denial of an STS installation.

Am. Sub. HB 119 Section 120.02(C)(4) defines "economic impact" as all of the following with respect to the approval or denial of an STS installation:

1. The cost of the proposed system
2. The cost of an alternative system that will not create a public health nuisance
3. A comparison of the cost of repairing a system as opposed to replacing the system with a new system
4. The value of the dwelling that the system services as indicated on the most recent tax duplicate

In order to comply with this legislation, the property owner must complete the following information for the property and proposed STS:	
Current land value most recent tax duplicate or cost of sub-lot	
Current value of building from most recent tax duplicate or estimated cost of proposed house or building	
Total value (item 1 & 2)	
Type and cost of selected HSTS from installer	
Type and cost of all available HSTS options from installer	

I have reviewed the available HSTS options and their corresponding costs and have accurately completed the required information.
