

SAVE MORE THAN FOOD

MAKE A DIFFERENCE

WASTED FOOD = WASTED RESOURCES

Nearly one million pounds of food enters the Franklin County sanitary landfill every single day. When food goes to waste – so does all of the time, money and resources that went into producing and distributing it.

Food wasted in central Ohio in 2018 is the equivalent to wasting:

- 41 billion gallons of water
- 22 million gallons of gas
- 160,000 acres of land

Food businesses can make a difference. Talk to your health inspector about how to donate safely.
