In November 2017, Franklin County Public Health (FCPH) completed a Community Health Assessment (CHA) which was a comprehensive collection and analysis of data that was used to identify the health needs of our community. The CHA was used to inform community decision-making, the prioritization of health problems and ultimately the development of the 2018-2020 Franklin County Community Health Improvement Plan (CHIP).

FCPH engaged and convened Health Works Franklin County to complete the CHIP process. Health Works Franklin County is a partnership between the Franklin County Board of Commissioners and FCPH that also includes government agencies, non-profit organizations, and healthcare organizations from throughout the community. A collective impact approach was used to ensure sustainable progress. Collective impact is based on the idea that in order for organizations to create lasting solutions to social problems, they need to coordinate their efforts and work together around a specific set of goals.

Members worked together to identify outcomes, health equity populations, strategies and action steps for each of the four priority areas.
Priority Area 1: Chronic Disease

Access & Awareness

- **Community Health Workers (CHWS) Enrolled**: 178 residents living in 37 zip codes
- **243 Adult Health Education Modules Completed**
- **1,480 HUB Pathways**
